SELECTION Milling G24

FRANKEN

Milling Technology
Tecnologia de Fresamento

More than 100 years of precision and innovation.

Ever since its foundation FRANKEN as part of the EMUGE-FRANKEN company association has been developing and manufacturing milling tools. The wide range of end mills of solid carbide and HSS as well as PCD and CBN inserts or milling cutters with indexable inserts is characterised by precision and innovation.

The production in our German manufacturing plant in Rückersdorf includes standard end mills and bore cutters as well as highly precise special form and profile milling tools. With its large variety of tool types and cutting materials, the consistently high standards and uncompromising precision, our product range of milling cutters meets even the highest quality requirements.

In addition to our selection of milling tools, we also offer a comprehensive range of clamping systems, tool holders and accessories.

Mais de 100 anos de precisão e inovação.

Desde a sua fundação, a FRANKEN, como parte da empresa EMUGE-FRANKEN, tem desenvolvido e fabricado ferramentas de fresamento. Com ampla gama de fresas de topo de metal duro integral e em HSS, bem como, pastilhas de PCD e CBN e fresas com pastilhas intercambiáveis, caracterizada pela precisão e inovação.

A produção na nossa fábrica alemã em Rückersdorf inclui fresas de topo standard e ferramentas de perfurar, assim como ferramentas especiais, fresas de perfil de alta precisão. Com sua grande variedade de ferramentas e de materiais de corte, nossa linha de produtos atende aos mais altos requisitos de qualidade e aos padrões elevados de precisão necessários.

Além de nossa seleção de ferramentas de fresamento, também oferecemos uma linha ampla de sistemas de fixação, porta-ferramentas e acessórios.

The following TOP-Cut tools are versatile end mills made from solid carbide which can be used in nearly all materials and milling strategies due to their special geometry properties.

Characteristics:

- Variable helix angle
- Tapered core diameter
- High-performance coating
- Optionally available with internal coolant supply, axial exit (ICA)

Main feature:

Universal use, for all material groups.

Available tools:

- Solid carbide end mills
- Solid carbide end mills with corner radius
- Solid carbide slot drills
- Solid carbide ball nose end mills
- Solid carbide torus end mills

As seguintes ferramentas TOP-CUT são fresas versáteis fabricadas em metal duro podendo ser usadas em quase todos os materiais e estratégia de fresagem devido às suas propriedades geométricas especiais.

Características:

- Ângulo de hélice variável
- Núcleo da ferramenta reforçado
- Revestimento de alto desempenho
- Opcionalmente disponível com refrigeração interna, saída axial (ICA)

Principal característica:

Uso universal, para todos os grupos de materiais..

Ferramentas disponíveis:

- Fresas de metal duro
- Fresas de metal duro com raio de canto
- Brocas de metal duro
- Fresas esféricas de metal duro
- Fresas tóricas de metal duro

- Multi-functional, high performance tool
- With ENORM geometry
- Low-vibration machining
- Centre cutting
- 3 lengths available

- Multifuncional, ferramenta de alto desempenho
- Com geometria ENORM
- Maquinação com baixa vibração
- Corte central
- 3 tamanhos disponíveis

The following pages presents a selection of the most important FRANKEN TOP-Cut carbide ball nose and torus end mills. These are specially designed for the die and mould industry. Thanks to a universal tool geometry different materials can be machined in roughing and finishing operations. The use of these tools on modern machining centres with 5-axis technology is also possible..

Characteristics:

- Universal flute geometry
- Different lengths
- Different, highly accurate corner radii
- Modern cutting material
- High performance coating

Main feature

- For almost all materials
- Suitable for roughing, finishing and HSC finishing

As páginas a seguir apresentam uma seleção das mais importantes das fresas FRANKEN TOP-CUT fresas de topo esféricas e tóricas. Essas são especialmente fabricadas para a indústria de moldes e matrizes. Graças a uma geometria universal da ferramenta, diferentes materiais podem ser trabalhados em desbaste e acabamento. O uso dessas ferramentas em centros de maquinação com a tecnologia de 5 eixos também é possível.

Características:

- Ranhura com geometria universal
- Comprimentos diferentes
- Raios de canto diferentes e altamente precisos
- Material de corte moderno
- Revestimento de alto desempenho

Característica principal:

- Para quase todos os materiais
- Adequado para desbaste, acabamento e acabamento HSC

- Multi-functional, high performance tool
- Patented chisel edge
- 2 lengths available

- Multifuncional, ferramenta de alto desempenho
- Ponta de cinzel patenteada
- 2 tamanhos disponíveis

FRANKEN
Multi-Cut

Page · Página 30

Multi-Cut end mills were developed in particular for high-performance roughing operations. Due to variable spacing of flutes combined with the NR profile vibrations and cutting forces are minimised.

Characteristics:

- Variable spacing
- Stabilised cutting edge
- High-performance coating
- Optionally available with internal coolant supply, axial exit (ICA)

Main feature:

Process-reliable roughing

Available tools::

- Solid carbide end mills

As fresas Multi-Cut foram desenvolvidas particularmente para o alto desempenho em operações de desbaste. Devido ao espaçamento variável das ranhuras combinado com as vibrações do perfil NR as forças de corte são minimizadas.

Características:

- Espaçamento variável
- Fio de corte estabilizado
- Revestimento de alto desempenho
- Opcionalmente disponível com refrigeração interna, saída axial (ICA)

Característica principal:

Desbaste confiável no processo

Ferramentas disponíveis:

- Fresas de metal duro

- Multi-functional, high performance tool
- Very low cutting forces
- Centre cutting
- 2 lengths available

- Multi-funcional, ferramenta de alto desempenho
- Forças de corte muito baixas
- Corte central
- 2 tamanhos disponíveis

- NR** fine fino
- Carbide**
- DIN 6535** HA HB
- 45°** **45°**
- 3-5°**
- Vc/fz** 53
- Optional · Opcional**

Allround

Allround

Coating · Revestimento

Applications – material (see page 4)

- For almost all materials
- Suitable for roughing under unstable conditions

Aplicações - material (consulte a página 4)

- Para quase todos os materiais
- Adequado para desbaste sob condições instáveis

TiNox-Cut

Page · Página 32 - 33

The solid carbide end mills **TiNox-Cut "Base"** were developed to meet the special requirements for machining stainless- and acid-resistant steels. These tools are the entry level products into our TiNox-Cut product line and are designed as a universal solution especially for mechanical engineering as well as the chemical and food industries. These milling tools can be used both for roughing and finishing operations. The use of the latest coatings in combination with a high performance carbide substrate makes it possible – depending on the milling strategy – to use them also for dry machining of some stainless- and acid-resistant special alloys (e.g. 1.4301, 1.4571, 1.4404).

Characteristics:

- Variable spacing
- Suitable geometry
- High performance TiN/TiAlN coating
- Matching carbide substrate

Main feature:

Machining of stainless- and acid-resistant steels.

Available tools:

- Solid carbide end mills

As fresas de metal duro **TiNox-Cut "Base"** foram desenvolvidas para atender os requisitos especiais para a maquinação de aços inoxidáveis e resistentes a ácidos. Essas ferramentas são produtos básicos na nossa linha TiNox-Cut e são desenhadas como uma solução universal, especialmente para engenharia mecânica assim como as indústrias química e alimentar. Essas ferramentas podem ser usadas tanto para desbaste quanto para acabamento. O uso de revestimentos de última geração em combinação com o alto desempenho do substrato de metal duro torna possível - dependendo da estratégia de fresagem - usá-las também para maquinação a seco em algumas ligas resistentes a ácido e inoxidável (por exemplo, 1.4301, 1.4571, 1.4404).

Características:

- Espaçamento variável
- Geometria adequada
- Revestimento TiN / TiAlN de alto desempenho
- Substrato de metal duro compatível

Característica principal:

Maquinação de aços inoxidáveis e resistentes a ácidos.

Ferramentas disponíveis:

- Fresas de metal duro

- High performance tool
- Finishing end mill for tough materials
- Special geometry prevents vibration
- Variable spacing

- Ferramenta de alto desempenho
- Fresa de acabamento para materiais resistentes
- Vibrações evitadas devido à geometria especial
- Espaçamento variável

Cold-Air Nozzle
Injetor de ar frio

Delivery includes:

- With flexible hose (length approx. 300 mm) for cold air
- Silencer (SN14) for hot exhaust air
- Ball-valve with fitting (1/4") for inlet hose (6 mm) with quick-change attachment (7.2 mm)

A entrega inclui:

- Mangueira flexível (comprimento aprox. 300 mm) para ar frio
- Silenciador (SN14) para exaustão de ar quente
- Válvula de esfera com encaixe (1/4 ") para entrada da mangueira (6 mm) com acessório de troca rápida (7,2 mm)

FRANKEN
Hard-Cut

Page · Página 36 - 37

The Hard-Cut series was specifically developed for machining hardened materials. The Hard-Cut end mill is the specialist for the requirements of hard milling due to a very high wear-resistant carbide substrate combined with a suitable PVD coating.

Ball nose end mills and torus end mills with very tight tolerances are available for the die and mould industry.

Characteristics:

- Variable spacing
- High number of flutes enable high feed rates
- High-performance coating
- Stable design due to large core diameter

Main feature:

Machining hard materials up to 66 HRC.

Note:

The cold-air nozzle provides effective cooling in hard milling.

Available tools

- Solid carbide ball nose end mills
- Solid carbide torus end mills

A série Hard-Cut foi desenvolvida especificamente para maquinar materiais duros. A fresa Hard-Cut é a especialista para os requisitos de uma fresagem dura graças ao seu substrato de metal duro com alta resistência ao desgaste combinado com um revestimento PVD adequado.

Fresas esféricas e tóricas com tolerâncias muito restritas estão disponíveis para a indústria de moldes e matrizes.

Características:

- Espaçamento variável
- Multi navalhas para um alto avanço
- Revestimento de alto desempenho
- Design estável devido ao grande diâmetro do núcleo

Característica principal:

Maquinação de materiais duros até 66 HRC.

Nota:

O injetor de ar frio fornece resfriamento eficaz em fresagem dura.

Ferramentas disponíveis:

- Fresas esféricas de metal duro
- Fresas tóricas de metal duro

- High performance tool
- Patented chisel edge
- 2 lengths available

- Ferramenta de alto desempenho
- Ponta de cinzel patenteada
- 2 tamanhos disponíveis

Alu-Cut

Page · Página 40 - 44

The versatile solution for machining aluminium

These new tools have been developed for machining aluminium and non-ferrous metals. The new, very smooth coating protects the tool against built-up edge and wear.

Characteristics:

- Variable spacing
- Available with WR profile for roughing
- Special geometry for machining aluminium
- Tools with and without corner radii

Main feature:

Suitable for milling of Aluminium-alloys with up to 7% Silicon.

Available tools:

- Solid carbide end mills
- Solid carbide end mills with corner radius
- Solid carbide ball nose end mills

A solução versátil para maquinar alumínio

Essas novas ferramentas foram desenvolvidas para maquinar alumínio e metais não ferrosos. O novo revestimento muito suave protege a ferramenta contra a rebaba e o desgaste.

Características:

- Espaçamento variável
- Disponível com perfil WR para desbaste
- Geometria especial para maquinar alumínio
- Ferramentas com e sem raios de canto

Característica principal:

Adequado para maquinar ligas de alumínio com até 7% de silício.

Ferramentas disponíveis:

- Fresas de metal duro
- Fresas de metal duro com raio de canto
- Fresas esféricas de metal duro

- High performance tool
- Special geometry for the machining of aluminium
- Centre cutting

- Ferramenta de alto desempenho
- Geometria especial para maquinação de alumínio
- Corte central

Coating · Revestimento

Applications – material (see page 4)

- For wrought aluminium alloys
- For aluminium alloys with a silicon content of up to 7%
- With GLT coating also for copper alloys

Aplicações - material (consulte a página 4)

- Para ligas de alumínio forjado
- Para ligas de alumínio com um teor de silício de até 7%
- Com revestimento GLT também para ligas de cobre
